- Communication
- Time Management
- Problem Solving
- Attention To Detail
- Critical Thinking
- Adaptability
- Creativity
- Project Management

## LANGUAGES

- English (C1)
- Lithuanian (Native)

## PROFILE

I graduated with a Bachelor's degree in Informatics Systems, specializing in Software Systems, in 2018. After university, my passion for storytelling led me to pursue a creative path as a self-published fiction author on Amazon, where I honed my writing and project management skills from 2018 to 2021.

In 2021, I shifted my focus back to my technical roots, and have been working towards building a career in the IT industry, specifically in web development. Most recently, I expanded my skillset by studying Digital Design in 2023, allowing me to blend my creative background with my technical expertise.

I am now actively seeking opportunities in front-end development, with a strong interest in crafting intuitive, user-friendly interfaces. I am also open to roles in full-stack development, digital design, and video game development, where I can apply my unique combination of creativity and technical knowledge to deliver high-quality digital experiences.

## WORK EXPERIENCE

**Self-Employed** 2024 - PRESENT

Unity Developer

- Creating experiences with the unity game engine.

**Freelance** 2021-2024

Web Developer

- Created web designs with the Figma app
